Python, Javascript, UI/UX Design, HTML & CSS, ReactJS, TailwindCSS, Figma, Framer, SQL, MongoDB, Trello, Git, Vercel, Linux (Basics), CI/CD Pipeline

EXPERIENCE

Product Designer

August 2023 – November 2024

Vyapari Sang

Bhopal, MP

- Single-handedly **conceptualized, designed, and executed product development** from scratch to completion, encompassing ideation, UX/UI design, user research, and user empathy, while closely aligning with business and client requirements.
- Spearheaded the startup venture of colleague, leveraging comprehensive product design expertise to create innovative solutions, from ideation and conceptualization to design implementation, **primarily worked under Vyapari Sang App**.

Freelancer

February 2023 – July. 2024

Various Clients

Bhopal, MP

- Collaborated with startups and small businesses to deliver end-to-end digital solutions, including user research, wireframing, interactive prototyping, and responsive UI development using modern frameworks like React.js and Tailwind CSS.
- Designed and deployed visually consistent, conversion-focused interfaces across multiple platforms, improving user engagement and client retention; integrated frontend designs with backend systems while ensuring accessibility and cross-browser compatibility.

PROJECTS

The Brain Room | [Github](#) | [Demo](#)

June 2025

- Developed a full-stack Mental Health Companion web app using the MERN stack, Tailwind CSS, and OpenAI's LLM for AI-powered chatbot support.
- Implemented core features like Daily Mood Check, dynamic mental health reports with tailored suggestions, and a secure user forum for peer interaction.

ERP & CRM Web App | [Github](#)

January 2025

- A full-stack ERP/CRM app built with the MERN stack using Ant Design and Redux. Features include invoice, quote, payment, and customer management.

Events Management App | [Github](#)

May. 2024

- I designed and developed an Eventbrite, BookMyShow like events management system with **user authentication, event creation, and participation features**. Where Organizers can **manage events, invite others, and admins have full control**. Visitors can browse events with prompts to sign up or log in for further interaction. This project is made with Next.Js, Typescript and MongoDB.

Mandi Baazar | [Github](#)

October 2023

- Created a website where farmers can sell their crop to the highest bid offer from businessmen and other potential buyers. This project was carried out in Django and the database used was Sqlite.

EDUCATION

Lakshmi Narain College of Technology

August 2022 – June 2025

B.Tech Computer Science & Engineering

Bhopal, MP

Shri Vaishnav Polytechnic College

September 2019 – May 2022

Diploma in Computer Science & Engineering

Indore, MP

POSITION OF RESPONSIBILITY

UI/UX Design Lead and Core Team Member

Sept. 2023 – Sept. 2024

Google Developers Student Club, LNCT Group of Colleges

Bhopal, MP

- Facilitated and Mentored students enrolled in Courseworks for UI/UX Design, explaining **challenging concepts and fundamental designing knowledge** to college's GDSC Design Community.

Community Moderator and Batch Leader

June 2022 – September 2022

Devsnest

Remote

- Onboarded 115+ new members into the Devsnest learning community by providing course resources, guidance, and support. Being a Community Moderator, I was also expected to manage the Devsnest Discord server and maintain a safe and positive environment of peer learning.
- Formed balanced peer groups based on skill assessment to ensure collaborative growth. As Batch Leader, reviewed and evaluated team submissions, ensuring quality before forwarding to community leadership.
